

Participant's responses for each survey since 2022-03-13 05:00:00

[illegible]

Stacked bar chart showing the number of survey answers per day for the variable 'expected number of survey_answers'. The chart displays a distribution of answers across 30 days, with a significant peak on the 30th day reaching nearly 90 answers. The legend indicates the expected number of survey answers is 3 per day.
